

Our Toddler Community classrooms nurture the young child from 15 months to 3 years. This specialised Montessori environment encourages small hands towards big achievements in independence and concentration, thinking and doing things for themselves within a caring community.

A deep respect for the competence and capacities for the young child is the foundation of the Toddler Community.

Montessori understands that all children, even the very youngest thrive on purposeful, self-directed hands-on activity.

EARLY LEARNING

A sense of wonder, curiosity and consideration for others is nurtured in each child and a guidance approach is used to assist the child towards learning positive behaviours.

This is an indoor-outdoor program with an emphasis on the natural environment. Food preparation and serving, cleaning and self-care skills are also important for the young child as they build their understanding of themselves and the world from the inside outwards.
