

A Montessori 0-3 program for parents and children in a supportive environment. An experienced facilitator leads the program. Parents learn alongside their child and come to understand how to best support their child's learning journey.

A wider range of activities are offered including art, sensorial, practical life, music and language.

It gives children the opportunity to become comfortable and confident in a group of mixed age children, some of whom may become classmates and long-term friends.

PLAYGROUP

It also gives parents the chance to develop friendships based on shared interests and philosophies.

Children who attend Playgroup have a very smooth transition into our Early Learning and Cycle 1 classrooms, as they are very aware of the routines and expectations of a Montessori classroom, and are familiar with the school environment
